metallbau

metallbau is aimed primarily at decision-makers from the structural metal and steel construction trade in the D-A-CH countries. This means a total of around 30 000 active companies. Target audiences include both building trade- as well as industrially-oriented processors. The articles take into account the interests of managing directors as well as the working environment of the responsible master craftsmen, technicians, engineers in planning, production and on site. Because interdisciplinary cooperation is becoming increasingly important for the various trades involved in a building project, we also address this entrepreneurial development.

The portfolio for metallbau readers includes classic topics such as windows, doors, facades, gates, heated and unheated conservatories, balconies, stairs, fences and railings. Furthermore, the companies also manufacture components for industry and fellow entrepreneurs on modern machinery such as laser, plasma, gas or water jet cutting systems.
